

Address to readers

Dear colleagues,

Dear friends of BulNoso,

In front of you is the next number of BulNoso Academy's publications - this handbook is dedicated entirely to hand hygiene in medical practice. We are glad to provide you with this first manual in Bulgarian, as a source of contemporary information on the problem and, most importantly, as an instrument to implement the innovative strategies and approaches recommended by the WHO.

We wish you success!

BulNoso Board

CONTENTS
